To Whom It May Concern:

It is with great pleasure that I write this letter of reference on behalf of Michael Dooley and Dooley Construction. Like thousands before us, my wife Kristi and I found our slice of Paradise in the Florida Keys. We commissioned Dooley Construction to build our home. The experience was simply fantastic! As out-of-town owners, we were concerned and apprehensive about building a home 100 miles from where we lived. Mike and his crew made the whole process easy and enjoyable.

We found the Company to be experienced, knowledgeable, and reliable. They took the project from permitting to certificate of occupancy in a seamless and smooth fashion. The craftsmanship of the work was superb and they coordinated the work of the different trades without a problem. I visited the site on a weekly basis and not once did I have to ask for something to be redone because of poor quality. More importantly, we passed every inspection as scheduled.

Kristi and I were so impressed with the building process, that we had no hesitation in asking Mike to manage the property for us. We have had an incredible five years of enjoying our home. Mike and his crew have taken the headaches of home ownership away, allowing us to relax when we are home in Paradise.

Without hesitation I give Mike and Dooley Construction my highest recommendations. If you have any questions, please do not hesitate to contact me, I would be happy to share my experiences with you.

Sincerely,

Ivan Puente, MD, FACS
