Subject: Re: Referral letter

To whom it may concern,

Dooley construction was commissioned by my wife and I for the project of adding on a third floor bedroom, office, and his and her bathrooms with adjacent patio decks, a new wing consisting of 2 floors including 3 bedrooms and 3 baths, a laundry room and kitchen as well as a Great room. An existing pool redo and restructuring the garage and deck were also part of the job. Finally all of this was very complex as it was to be integrated with the existing 2 story, 4 bedroom 3 bath layout. In addition, they orchestrated all of the associated work involved in the project from initial concept through architectural drawings and subsequent engineering. From the onset of the project Dooley construction, lead by Mike Dooley and his team were complete in everything they did. There were no ambiguities associated with the project as there are so many times in construction. From day one they developed a line item budget for the project and continually updated this progress billing as the project evolved. Any questions and they were a phone call away.

The teams long standing business in the Plantation Key area was also a significant benefit as they certainly know the area with ALL of it's associated rules, regulations and nuisances to navigate through it all in a timely manner. Open and flexible to change but knowledgeable and efficient the team delivered a superior project within the anticipated timelines while dealing with all of the challenges associated with construction, including weather. I would certainly recommend using Dooley construction for a complete and professional home build or addition to an existing structure.
